Contents for Volume 171

Number 1, 7 *November* 1994

Special Issue: Essays from Biology, Physics and Philosophy

BLOMBERG, C., LILJENSTRÖM, H., LINDAHL, B. I. B. and ÅRHEM, P., Introduction 1

INGVAR, D. H., The Will of the Brain: Cerebral Correlates of Willful Acts . . 7

FREEMAN, W. J., Neural Networks and Chaos. 13

ROLAND, P. E., Obstacles on the Road Towards a Neuroscientific Theory of Mind 19

HESSLOW, G., Will Neuroscience Explain Consciousness?. 29

BLOMBERG, C., The Physicist's Road to Theoretical Biology and the Mind–Matter Problem 41

HOPFIELD, J. J., Physics, Computation, and Why Biology Looks so Different . 53

LANSNER, A. and LILJENSTRÖM., Computer Models of the Brain—How Far Can They Take Us? 61

HAKEN, H., A Brain Model For Vision in Terms of Synergetics . . . 75

ROSEN, R., On Psychomimesis 87

SVENSSON, G., Reflections on the Problem of Identifying Mind and Brain . 93

VON WRIGHT, G. H., On Mind and Matter 101

LINDAHL, B. I. B. and ÅRHEM, P., Mind as a Force Field: Comments on a New Interactionistic Hypothesis 111

Number 2, 21 *November* 1994

NIWA, H.-S., Self-organizing Dynamic Model of Fish Schooling . . . 123

KOCH, A. L., The Problem of Hyphal Growth in Streptomycetes and Fungi . 137

YOUHEI, F. and YAMAMOTO, K., Influence of Slight Sequence Changes on the Free Energy of a Single Stranded Ribonucleic Acid Molecule . . . 151

SCHOUTENS, J. E., Prediction of Elastic Properties of Sperm Flagella . . 163

FUKUCHI, S., OKAYAMA, T. and OTSUKA, J., Evolution of Genetic Information Flow From the Viewpoint of Protein Sequence Similarity . . . 179

WONG, P., Mechanism of Control of Erythrocyte Shape: A Possible Relationship to Band 3 197

FORBES, W. F. and AGWANI, N., A Suggested Mechanism for Aluminum Biotoxicity 207

LIÓ, P., RUFFO, S. AND BUIATTI, M., Third Codon G + C Periodicity as a Possible Signal for an "Internal" Selective Constraint 215

27 229HI XL 1125
4/95 31249-200

MUSILA, M. and LÁNSKÝ, P., On the Interspike Intervals Calculated from Diffusion Approximations of Stein's Neuronal Model with Reversal Potentials 225

LETTER TO THE EDITOR

BLACKBURN, D. G. and SCHNEIDER, C. W., Old Wine in a New Bottle: Evolution by Another Name 233

Number 3, 7 *December* 1994

XU, J., CHAO, Y. and CHEN, R., Fractal Geometry Study of DNA Binding Proteins 239

SOZOU, P. D. and HOUSTON, A. I., Parental Effort in a Mating System Involving Two Males and Two Females 251

SEGEL, I. H., The Effects of Labeled and Unlabeled Impurities on the Analysis of Equilibrium Binding and Initial Velocity Data by Means of Scatchard Plots 267

MICHELSON, S. and SCHULMAN, H., CaM Kinase: A Model for its Activation and Dynamics 281

LÙSHNIKOV, A. A., VESALA, T., KULMALA, M. and HARI, P., A Semiphenomenological Model for Stomatal Gas Transport 291

DI GIULIO, M., On the Origin of Protein Synthesis: A Speculative Model Based on Hairpin RNA Structures 303

KLIPP, E. and HEINRICH, R., Evolutionary Optimization of Enzyme Kinetic Parameters: Effect of Constraints 309

SPEAKMAN, J. R., HAYS, G. C. and WEBB, P. I., Is Hyperthermia a Constraint on the Diurnal Activity of Bats? 325

KOESLAG, J. H., Koinophilia Replaces Random Mating in Populations Subject to Mutations with Randomly Varying Fitnesses 341

SUDA, H. and SAITO, M., Molecular Dynamics Simulations for Actin Monomers in Solution 347

LETTER TO THE EDITOR

NEUTEL, A. M., ROERDINK, J. B. T. M. and DE RUITER, P. C., Global Stability of Two-level Detritus Decomposer Food Chains 351

Number 4, 21 *December* 1994

WELLER, K. and RECKNAGEL, R.-D., Promoter Strength Prediction Based on Occurrence Frequencies of Consensus Patterns 355

VASIEVA, O. O., VASIEV, B. N., KARPOV, V. A. and ZAIKIN, A. N., A Model of *Dictyostelium discoideum* Aggregation 361

COMINS, H. N., Equilibrium Analysis of Integrated Plant–Soil Models for Prediction of the Nutrient Limited Growth Response to CO_2 Enrichment . 369

BERRY, R. M. and NOWAK, M. A., Defective Escape Mutants of HIV . . 387

TYVAND, P. A., Inhomogeneous Markov Chain Model of Genetic Drift in Finite Autotetraploid Populations 397

PARSONS, P. A., Morphological Stasis: an Energetic and Ecological Perspective Incorporating Stress 409

KOCH, A. L. and WOLDRINGH, C. L., The Metabolic Inertness of the Pole Wall of a Gram-negative Rod 415

BJÖRKLUND, M., Species Selection on Organismal Integration 427

WALL, R. and HOWARD, J., Autosterilization for Control of the Housefly *Musca domestica* 431

Index to Volume 171

Actin monomers in solution, molecular dynamics simulations for, 347
Activity, diurnal, of bats, is hyperthermia a constraint on? 325
Aggregation, *Dictyostelium discoideum*, a model of, 361
AGWANI, N. (see FORBES, W. F.), 207
Aluminium biotoxicity; a suggested mechanism, 207
ÅRHEM, P. (see BLOMBERG, C.), 1
ÅRHEM, P. (see LINDAHL, B. I. B.), 111
Autosterilization for control of the housefly *Musca domestica*, 431
Autotetraploid populations, Markov chain model of genetic drift in, 397

Band 3 and the mechanism of control of erythrocyte shape, 197
Bats, is hyperthermia a constraint on the diurnal activity of? 325
BERRY, R. M. and NOWAK, M. A., Defective escape mutants of HIV, 387
Biology: why does it look so different?; physics and computation, 53
Biotoxicity of aluminium; a suggested mechanism, 207
BJÖRKLUND, M., Species selection on organismal integration, 427
BLACKBURN, D. G. and SCHNEIDER, C. W., Old wine in a new bottle: evolution by another name (letter), 233
BLOMBERG, C., The physicist's road to theoretical biology and the mind-matter problem, 41
BLOMBERG, C., LILJENSTRÖM, H., LINDAHL, B. I. B. and ÅRHEM, P., Introduction: Essays from Biology, Physics and Philosophy, 1
Brain, computer models of, 61
Brain and mind identification, the problem of, 93
Brain model for vision in terms of synergetics, 75
Brain will: cerebral correlates of willful acts, 7
BUIATTI, M. (see LIO, P.), 215

CaM kinase: a model for its activation and dynamics, 281
CO_2 enrichment, integrated plant-soil models for prediction of the nutrient limited growth response to, 369
Cerebral correlates of willful acts, 7
CHAO, Y. (see XU, J.), 239
Chaos and neural networks, 13
CHEN, R. (see XU, J.), 239
Codon G + C periodicity as a possible signal for an "internal" selective constraint, 215
COMINS, H. N., Equilibrium analysis of integrated plant-soil models for prediction of the nutrient limited growth response to CO_2 enrichment, 369
Computation, physics, and why biology looks so different, 53
Computer models of the brain, 61
Consciousness: will it be explained by neuroscience? 29
Consensus patterns, promoter strength prediction based on occurrence frequencies of, 355

DE RUITER, P. C. (see NEUTEL, A. M.), 351
Detritus decomposer food chains, global stability of (letter), 351
Dictyostelium discoideum aggregation, a model of, 361
Diurnal activity of bats, is hyperthermia a constraint on? 325
DNA binding proteins, fractal geometry study of, 239

Ecological perspective, including stress, of morphological stasis, 409
Elastic properties of sperm flagella, prediction of, 163
Energetic perspective, incorporating stress, of morphological stasis, 409
Enzyme kinetic parameters, evolutionary optimization of; effect of constraints, 309
Erythrocyte shape control mechanism, 197
Evolution by another name; old wine in a new bottle (letter), 233
Evolution of genetic information flow from the viewpoint of protein sequence similarity, 179
Evolutionary optimization of enzyme kinetic parameters; effect of constraints, 309

Fish schooling: a self-organizing dynamic model, 123
Flagella, sperm, prediction of elastic properties of, 163
Food chains, detritus decomposer, global stability of (letter), 351

FORBES, W. F. and AGWANI, N., A suggested mechanism for aluminium biotoxicity, 207
Force field, mind as; a new interactionistic hypothesis, 111
Fractal geometry study of DNA binding proteins, 239
Free energy of a single stranded ribonucleic acid molecule, influence of slight sequence changes on, 151
FREEMAN, W. J., Neural networks and chaos, 13
FUKUCHI, S., OKAYAMA, T. and OTSUKA, J., Evolution of genetic information flow from the viewpoint of protein sequence similarity, 179
Fungi, hyphal growth in, 129

G + C periodicity as a possible signal for an "internal" selective constraint, 215
Genetic drift in finite autotetraploid populations, Markov chain model of, 397
Genetic information flow, evolution of, from the viewpoint of protein sequence similarity, 179
GIULIO, M. DI., On the origin of protein synthesis: a speculative model based on hairpin RNA structures, 303
Global stability of two-level detritus decomposer food chains (letter), 351
Gram-negative rod, the metabolic inertness of the pole wall of, 415
Growth, hyphal, in streptomycetes and fungi, 129
Growth response, nutrient limited, to CO_2 enrichment, integrated plant-soil models for prediction of, 369

Hairpin RNA structure, basis for model of the origin of protein synthesis, 303
HAKEN H., A brain model for vision in terms of synergetics, 75
HARI, P. (see LUSHNIKOV, A. A.), 291
HAYS, G. C. (see SPEAKMAN, J. R.), 325
HEINRICH, R. (see KLIPP, E.), 309
HESSLOW, G., Will neuroscience explain consciousness? 29
HIV, defective escape mutants of, 387
HOPFIELD, J. J., Physics, computation, and why biology looks so different, 53
HOUSTON, A. I. (see SOZOU, P. D.), 251
Housefly *Musca domestica*, autosterilization for control of, 431
HOWARD, J. (see WALL, R.), 431
Hyperthermia, is it a constraint on the diurnal activity of bats? 325
Hyphal growth in streptomycetes and fungi, 129

Identifying mind and brain, reflections on the problem of, 93
Impurities, labeled and unlabeled, effects on analysis of equilibrium binding and initial velocity data by means of scatchard plots, 267
INGVAR, D. H., The will of the brain: cerebral correlates of willful acts, 7
Interactionistic hypothesis: mind as a force field, 111
Interspike intervals calculated from diffusion approximations of Stein's neuronal model with reversal potentials, 225

KARPOV, V. A. (see VASIEVA, O. O.), 361
Kinetic parameters, enzyme, evolutionary immunization of; effect of constraints, 309
KLIPP, E. and HEINRICH, R., Evolutionary optimization of enzyme kinetic parameters: effect of constraints, 309
KOCH, A. L., The problem of hyphal growth in Streptomycetes and fungi, 129
KOCH, A. L., and WOLDRINGH, C. L., The metabolic inertness of the pole wall of a Gram-negative rod, 415
KOESLAG, J. H., Koinophilia replaces random mating in populations subject to mutations with randomly varying fitnesses, 341
Koinophilia replaces random mating in populations subject to mutations with randomly varying fitnesses, 341
KULMALA, M. (see LUSHNIKOV, A. A.), 291

LÁNSKÝ, P. (see MUSILA, M.), 225
LANSNER, A. and LILJENSTRÖM, H., Computer models of the brain – how far can they take us? 61
LILJENSTRÖM, H. (see BLOMBERG, C.), 1
LILJENSTRÖM, H. (see LANSNER, A.), 61
LINDAHL, B. I. B. and ÅRHEM, P., Mind as a force field. Comments on a new interactionistic hypothesis, 111
LINDAHL, B. I. B. (see BLOMBERG, C.), 1
LIO, P., RUFFO, S. and BUIATTI, M., Third codon G + C periodicity as a possible signal for an "internal" selective constraint, 215

LUSHNIKOV, A. A., VESALE, T., KULMALA, M. and HARI, P., A semiphenomenological model for stomatal gas transport, 291

Markov chain model of genetic drift in finite autotetraploid populations, 397
Mating, random, is replaced by koinophilia in populations subject to mutations with randomly varying fitnesses, 341
Mating system involving two males and two females, parental effort in, 251
Matter and mind, 101
Metabolic inertness of the pole wall of a Gram-negative rod, 415
MICHELSON, S. and SCHULMAN, H., CaM kinase: a model for its activation and dynamics, 281
Mind and brain identification, problem of, 93
Mind as a force field; a new interactionistic hypothesis, 111
Mind and matter, 101
Mind-matter problem, the physicist's road to theoretical biology and, 41
Mind, obstacles on the road towards a neuroscientific theory of, 19
Molecular dynamics simulations for actin monomers in solution, 347
Morphological stasis: an energetic and ecological perspective incorporating stress, 409
MUSILA, M. and LÁNSKÝ, P., On the interspike intervals calculated from diffusion approximations of Stein's neuronal model with reversal potentials, 225
Mutants, escape, defective, of HIV, 387
Mutations with randomly varying fitnesses, koinophilia replaces random mating in populations subject to, 341

Networks, neural, and chaos, 13
Neural networks and chaos, 13
Neuronal model, Stein's, with reversal potentials, the interspike intervals calculated from diffusion approximations of, 225
Neuroscience: will it explain consciousness? 29
Neuroscientific theory of mind, obstacles on the road towards, 19
NEUTEL, A. M., ROERDINK, J. B. T. M. and DE RUITER, P. C., Global stability of two-level detritus decomposer food chains (letter), 351
NIWA, H.-S., Self-organizing dynamic model of fish schooling, 123
NOWAK, M. A. (see BERRY, R. M.), 387

OKAYAMA, T. (see FUKUCHI, S.), 179
Organismal integration, species selection on, 427
OTSUKA, J. (see FUKUCHI, S.), 179

Parental effort in a mating system involving two males and two females, 251
PARSONS, P. A., Morphological stasis: an energetic and ecological perspective incorporating stress, 409
Physicist's road to theoretical biology and the mind-matter problem, 41
Physics, computation, and why biology looks so different, 53
Plant-soil integrated models for prediction of the nutrient limited growth response to CO_2 enrichment, 369
Promoter strength prediction based on occurrence frequencies of consensus patterns, 355
Proteins, binding, DNA, fractal geometry study of, 239
Protein sequence similarity, evolution of genetic information flow from the viewpoint of, 179
Protein synthesis, origin of; a model based on hairpin RNA structure, 303
Psychomimesis, 87

RECKNAGEL, R.-D. (see WELLER, K.), 355
Ribonucleic acid molecule, influence of slight sequence changes on the free energy of, 151
RNA hairpin structure as basis for model of the origin of protein structure, 303
